

ABSTRACT

This invention relates to conjugates of the Vi polysaccharide of *S. typhi* with the carrier *Pseudomonas aeruginosa* recombinant exoprotein A (rEPA), and compositions thereof, and to methods of using of these conjugates and/or compositions thereof for eliciting an immunogenic response in humans, including responses which provide protection against, or reduce the severity of, *S. typhi* bacterial infections. The conjugates, and compositions thereof, are useful as vaccines to induce serum antibodies against *S. typhi* and are useful to prevent and/or treat illnesses caused by *S. typhi*.
